

PDFPW Demo

Browser-based PDF Presenter Console

Adapted from pdfpc demo

2026-04-26

Introduction

Hi! Welcome to the demo of PDFPW, a browser-based PDF presentation tool.

Setting up

- Open the presenter console first
- Then open the presentation window from the link
- Both windows will synchronize automatically via Broadcast Channel API

Hi! Welcome to the demo of PDFPW, a browser-based PDF presentation tool.

Setting up

- Open the presenter console first
- Then open the presentation window from the link
- Both windows will synchronize automatically via Broadcast Channel API

Let's get started!

The presenter view

The presenter console is on your monitor, visible only to you.

- Current slide with zoom capability
- Next slide preview
- Presentation timer with controls
- Current slide number and total slides
- Presenter notes (if configured)
- Overview mode for navigation

The presenter view

The presenter console is on your monitor, visible only to you.

- Current slide with zoom capability
- Next slide preview
- Presentation timer with controls
- Current slide number and total slides
- Presenter notes (if configured)
- Overview mode for navigation

The presentation window only shows the current slide to your audience.

Navigation

Forward navigation:

- Arrow keys: →, ↓
- Page: Page Down
- Enter/Return, Space

Forward navigation:

- Arrow keys: →, ↓
- Page: Page Down
- Enter/Return, Space

Backward navigation:

- Arrow keys: ←, ↑
- Page: Page Up
- Backspace

Forward navigation:

- Arrow keys: →, ↓
- Page: Page Down
- Enter/Return, Space

Backward navigation:

- Arrow keys: ←, ↑
- Page: Page Up
- Backspace

Fast navigation:

- Press Shift + ←/→ to skip 10 slides

Some people like overlays in their presentations

- i.e. slides that build up step-by-step

Some people like overlays in their presentations

- i.e. slides that build up step-by-step
- PDFPW supports such overlays

Some people like overlays in their presentations

- i.e. slides that build up step-by-step
- PDFPW supports such overlays
- The slide counter shows the overlay step

Some people like overlays in their presentations

- i.e. slides that build up step-by-step
- PDFPW supports such overlays
- The slide counter shows the overlay step
- Too long overlays may be boring for the audience

Some people like overlays in their presentations

- i.e. slides that build up step-by-step
- PDFPW supports such overlays
- The slide counter shows the overlay step
- Too long overlays may be boring for the audience
- Use them wisely!

- Press ↓ to jump to the next user slide (overlay group)

User slide navigation

- Press ↓ to jump to the next user slide (overlay group)
- Press ↑ to jump to the previous user slide

User slide navigation

- Press ↓ to jump to the next user slide (overlay group)
- Press ↑ to jump to the previous user slide
- This skips overlay steps within a slide

User slide navigation

- Press ↓ to jump to the next user slide (overlay group)
- Press ↑ to jump to the previous user slide
- This skips overlay steps within a slide
- Useful for quick navigation between topics

Jumping to specific slides

- Press G, then type a slide number, then press Enter to jump

Jumping to specific slides

- Press G, then type a slide number, then press Enter to jump
- Press Home to jump to the first slide

Jumping to specific slides

- Press G, then type a slide number, then press Enter to jump
- Press Home to jump to the first slide
- Press End to jump to the last slide

Jumping to specific slides

- Press G, then type a slide number, then press Enter to jump
- Press Home to jump to the first slide
- Press End to jump to the last slide
- Press Backspace to return to the previous position

Jumping to specific slides

- Press G, then type a slide number, then press Enter to jump
- Press Home to jump to the first slide
- Press End to jump to the last slide
- Press Backspace to return to the previous position
- Press Tab to open the overview dialog

Jumping to specific slides

- Press G, then type a slide number, then press Enter to jump
- Press Home to jump to the first slide
- Press End to jump to the last slide
- Press Backspace to return to the previous position
- Press Tab to open the overview dialog

Jumping to specific slides

- Press G, then type a slide number, then press Enter to jump
- Press Home to jump to the first slide
- Press End to jump to the last slide
- Press Backspace to return to the previous position
- Press Tab to open the overview dialog

This makes navigation flexible and efficient.

Features

- Press Tab or click the “一覽表示” button

Overview mode

- Press Tab or click the “一覽表示” button
- See all slides in a grid layout

Overview mode

- Press Tab or click the “一覽表示” button
- See all slides in a grid layout
- Click any slide to jump directly to it

Overview mode

- Press Tab or click the “一覽表示” button
- See all slides in a grid layout
- Click any slide to jump directly to it
- Press Esc or click outside to close

- Press Tab or click the “一覽表示” button
- See all slides in a grid layout
- Click any slide to jump directly to it
- Press Esc or click outside to close
- Perfect for quick navigation during Q&A

Notes can be shown in the presenter console.

- Notes are defined via external `.pdfpc` configuration files
- Notes are automatically loaded when available
- Notes apply to slides in an overlay group

Controlling the presentation view

- **Freeze** the presentation view

Controlling the presentation view

- **Freeze** the presentation view
 - Useful when searching for slides without confusing the audience
 - Click “投影固定” button to toggle
- **Fade to black** the presentation view

Controlling the presentation view

- **Freeze** the presentation view
 - Useful when searching for slides without confusing the audience
 - Click “投影固定” button to toggle
- **Fade to black** the presentation view
 - Useful when switching between slides and blackboard
 - Click “投影停止” button to toggle
- Status indicators show the current state

Controlling the timer

- Timer starts automatically when you navigate to slide 2+

Controlling the timer

- Timer starts automatically when you navigate to slide 2+
- Click the play/pause button to control the timer

Controlling the timer

- Timer starts automatically when you navigate to slide 2+
- Click the play/pause button to control the timer
- Press R to reset the timer

Controlling the timer

- Timer starts automatically when you navigate to slide 2+
- Click the play/pause button to control the timer
- Press R to reset the timer
- Timer shows remaining time or elapsed time based on configuration

Controlling the timer

- Timer starts automatically when you navigate to slide 2+
- Click the play/pause button to control the timer
- Press R to reset the timer
- Timer shows remaining time or elapsed time based on configuration
- Current time is always displayed below the timer

Freezing the presentation

When the presentation is frozen:

- The presentation window stops updating

Freezing the presentation

When the presentation is frozen:

- The presentation window stops updating
- You can navigate slides on your console without the audience seeing

Freezing the presentation

When the presentation is frozen:

- The presentation window stops updating
- You can navigate slides on your console without the audience seeing
- Perfect for previewing upcoming slides or finding specific content

Freezing the presentation

When the presentation is frozen:

- The presentation window stops updating
- You can navigate slides on your console without the audience seeing
- Perfect for previewing upcoming slides or finding specific content
- Click “投影固定” again to unfreeze

Blackout mode

When blackout is enabled:

- The presentation window goes black

Blackout mode

When blackout is enabled:

- The presentation window goes black
- Useful for redirecting attention or during breaks

Blackout mode

When blackout is enabled:

- The presentation window goes black
- Useful for redirecting attention or during breaks
- The timer continues running

Blackout mode

When blackout is enabled:

- The presentation window goes black
- Useful for redirecting attention or during breaks
- The timer continues running
- Click “投影停止” again to disable

Interface

All features are accessible via the presenter console:

- Mode buttons at the top (Freeze, Blackout, Overview)
- Timer in the bottom center
- Navigation buttons on the left and right
- Notes panel on the right side

All features are accessible via the presenter console:

- Mode buttons at the top (Freeze, Blackout, Overview)
- Timer in the bottom center
- Navigation buttons on the left and right
- Notes panel on the right side

Intuitive and mouse-friendly interface!

Keyboard shortcuts summary

Navigation:

- ←/→: Previous/next overlay step
- ↑/↓: Previous/next user slide
- Shift + ←/→: Skip 10 slides
- Home/End: First/last slide
- G + number + Enter: Jump to slide
- Backspace: Return to previous position
- Tab: Toggle overview mode

Controls:

- R: Reset timer
- Space: Pause/resume timer
- F: Toggle fullscreen (presentation window)

Additional presentation information is supported:

- Duration settings for countdown timer

Additional presentation information is supported:

- Duration settings for countdown timer
- Presenter notes per slide

Additional presentation information is supported:

- Duration settings for countdown timer
- Presenter notes per slide
- Custom slide labels

Additional presentation information is supported:

- Duration settings for countdown timer
- Presenter notes per slide
- Custom slide labels
- Configuration via `.pdfpc` files (compatible with pdfpc format)

Additional presentation information is supported:

- Duration settings for countdown timer
- Presenter notes per slide
- Custom slide labels
- Configuration via `.pdfpc` files (compatible with pdfpc format)
- JSON-based format, easy to edit

Technical

PDFPW is a modern, web-based presentation tool:

- Runs entirely in your browser

PDFPW is a modern, web-based presentation tool:

- Runs entirely in your browser
- No server backend required

PDFPW is a modern, web-based presentation tool:

- Runs entirely in your browser
- No server backend required
- Uses Broadcast Channel API for window synchronization

PDFPW is a modern, web-based presentation tool:

- Runs entirely in your browser
- No server backend required
- Uses Broadcast Channel API for window synchronization
- Supports modern browsers with File System Access API

PDFPW is a modern, web-based presentation tool:

- Runs entirely in your browser
- No server backend required
- Uses Broadcast Channel API for window synchronization
- Supports modern browsers with File System Access API
- PDF.js for reliable PDF rendering

PDFPW is a modern, web-based presentation tool:

- Runs entirely in your browser
- No server backend required
- Uses Broadcast Channel API for window synchronization
- Supports modern browsers with File System Access API
- PDF.js for reliable PDF rendering
- Progressive enhancement with graceful fallbacks

PDFPW respects the PDF presentation ecosystem:

- Compatible with `.pdfpc` configuration files

PDFPW respects the PDF presentation ecosystem:

- Compatible with `.pdfpc` configuration files
- Supports the same overlay notation as `pdfpc`

PDFPW respects the PDF presentation ecosystem:

- Compatible with `.pdfpc` configuration files
- Supports the same overlay notation as `pdfpc`
- Works with PDFs generated from LaTeX (Beamer), Typst (Touying), and other tools

PDFPW respects the PDF presentation ecosystem:

- Compatible with `.pdfpc` configuration files
- Supports the same overlay notation as `pdfpc`
- Works with PDFs generated from LaTeX (Beamer), Typst (Touying), and other tools
- Leverages existing PDF presentation ecosystem

Conclusion

- Support slides after your “last” slide

- Support slides after your “last” slide
 - Advanced topics, bibliography, Q&A, etc.
- The slide count helps you track progress
- Easy navigation to any slide via overview mode

—

THE END

**There may be additional slides with extra information,
available on demand if the audience asks**

Appendix

Acknowledgements

- This demo is adapted from the pdfpc demo
- pdfpc was a fork of pdf-presenter-console
- Many thanks to the original authors and contributors
- Built with modern web technologies
